

# Senior Cyber Security Analyst Vancouver

**"Technology is constantly evolving, and at Inventx I am always at the forefront – a true springboard for my career."**

At Inventx, you actively shape the digital transformation of the financial and insurance industry. Cyber Security is a strategic imperative in the financial services sector. That is why our mission is to deliver best-in-class cyber security services to our clients.

You will join a team of passionate cyber security professionals with a broad range of technical expertise. We place a strong emphasis on continuous learning and development and intentionally build teams with members at different experience levels to ensure a high-performing and resilient cyber security organization.

For our Cyber Security Analysts, staying current with emerging threats, technologies, and industry trends is second nature. We actively support this through participation in industry events,

conferences, and training programs, as well as through self-driven research, in-depth studies, and hands-on projects.

To ensure true 24/7 operations, we work distributed between Switzerland and Canada. You can choose from a wide range of opportunities to contribute to the development, expansion, and operation of our Cyber Resilience Center.

Are you passionate about cyber security, living in Metro Vancouver and interested in working as part of an international setup?

## What is your scope for impact?

- Monitoring and analysis of security events using SIEM, EDR, and NIDS platforms to detect, analyze, and respond to cyber threats
- Incident Response and Forensics: Performing event triage, in-depth analysis, and incident response in line with established cyber defense processes and industry frameworks
- Threat Intelligence and Prevention: Leveraging cyber threat intelligence and proactive security tools to continuously improve the overall security posture
- Vulnerability Management: Identifying, assessing, and mitigating vulnerabilities across the IT infrastructure
- Projects and Automation: Actively contributing to and shaping initiatives focused on continuous improvement and security automation

## What do you bring with you?

- **Education and Certifications:** Completed education in computer science or a related field, along with relevant cyber security certifications or advanced training (e.g. SANS/GIAC, OSCP)
- **Professional Experience:** Several years of hands-on experience working with SIEM solutions and other core SOC tools, combined with broad exposure to security operations
- **Analytical Skills:** Strong curiosity and excellent analytical and problem-solving skills to assess and respond to complex cyber threats
- **Flexibility:** Interest in working with our team in Vancouver to support 24/7 operations, as well as willingness to spend up to one month per year working in Switzerland to foster team collaboration and exchange
- **Language Skills:** Fluency in English both written and spoken - German is an advantage

# Why Inventx?

Our company culture is built on our core **values** of innovation, collaboration, and Swiss roots — combined with a unique team spirit and a range of attractive benefits:

- Flexible working arrangements, including adaptable schedules and hybrid work options
- Support for professional development, including learning initiatives and further education opportunities
- Competitive vacation policy
- Regular employee and team events
- Opportunities to engage in internal communities and innovation initiatives

Hear directly from our **two founders** about our vision and culture, and explore more insights on our **company blog**.

## Innovation

## Interaktion

## Swissness
